Standards for grading and promotion of MD students – Clerkship (Years 3 and 4)

**Approval body:** MD Program Curriculum Committee  
**Date of original adoption:** 10 February 2012  
**Date of last review:** 12 July 2016  
**Date of last amendment:** 12 July 2016; 20 June 2017; 9 October 2018  
**Date of next scheduled review:** 12 July 2020

**Introduction**

These Standards serve as an adjunct to the *University Assessment and Grading Practices Policy* and describe the practices of the MD program with regard to determining student grading and promotion in Clerkship (Years 3 and 4) and also apply to students registered in the MD Extended Clerkship. They are complemented by the MD Program’s *Guidelines for the assessment of students in academic difficulty* and *Guidelines for the assessment of student professionalism*.

**Standards**

1. **Authority of the Board of Examiners:** All decisions related to a MD student’s grading and promotion are ultimately made by the Board of Examiners, a standing committee of the Council of the Faculty of Medicine. To inform these decisions, the Board of Examiners receives recommendations from the Clerkship Director (or designate) and/or and Faculty Lead, Ethics & Professionalism.

2. **Individual assessment marks and course grades:** Individual assessment marks and course grades are normally released through the Medical Student Information System (MedSIS).
   
   a. **Individual assessment marks:** Marks for individual assessments are not subject to any formal approval, but rather serve as the basis for decisions about overall course standing. Individual assessment marks do not appear on transcripts or other documentation provided by the MD Program to external individuals or organizations.

   b. **Provisional (unofficial) course grades:** The MD program calculates numerical grades for each course for the purpose of identifying students whose performance is unsatisfactory and for informing the adjudication of academic awards. Course grades communicated through MedSIS or other means constitute an unofficial record; they are reserved exclusively for internal use and do not appear on transcripts or other documentation provided to external individuals or organizations. Provisional course grades in MedSIS are subsequently recommended to the Board of Examiners (see Sections 7 and 8).

   a. **Official course grades:** Upon approval of the Board of Examiners, course grades are loaded into the Repository of Student Information (ROSI), which is the official record and is used by the University to generate official transcripts. MD program course grades are transcripted as “Credit (CR)”, “No Credit (NC)”, “In Progress” (IPR) or “Incomplete” (INC).

3. **Standards of achievement on each type of assessment, other than professionalism:** It is the responsibility of each Clerkship course committee, in consultation with the relevant theme leads as well as the Student Assessment and Standards Committee (SASC), to define satisfactory completion of each type of assessment required during their course. This section does not apply to the assessment of professionalism, which is addressed in the MD Program’s *Guidelines for the assessment of student professionalism*.
Specifically:

a. **Assessment methods**: Course committees are responsible for establishing the assessment methods to be used in the course. These assessment methods are subject to periodic review by the Student Assessment and Standards Committee (SASC) and/or Program Evaluation Committee. Changes to assessment methods must be brought to the attention of the Clerkship Director, in accordance with the MD Program’s *Guidelines for making curricular changes*.

b. **Definition of a “clear pass”**: For every marked assessment in a Clerkship course, course committees are responsible for defining the numerical threshold above which a student’s performance on that assessment will be considered unequivocally satisfactory (a “clear pass”) and for establishing assessment tools to measure achievement of this threshold. In many Clerkship courses, this threshold is 70%. Assessments on which a “clear pass” is achieved will be recorded as “CR” (“Credit”) in MedSIS.

c. **Definition of a “clear failure”**: On numerically marked (scored) assessments of every Clerkship course in the MD program, 60% is the universal threshold below which a student’s performance is deemed unsatisfactory (a “clear failure”). Course committees are responsible for defining what constitutes performance above and below this threshold and establishing suitable assessment tools accordingly. Assessments on which a “clear failure” is achieved will be recorded as “NC” (“No Credit”) in MedSIS.

d. **Definition of “borderline performance”**: Numerical marks for individual assessments that fall at or above 60% and below the “clear pass” threshold established by the Clerkship course are deemed borderline. Borderline assessments will be recorded as “CR” (“Credit”) in MedSIS, unless a Focused Learning Plan is assigned, in which case an interim standing of “CON” (“Conditioned”) on the assessment will be recorded. (See Section 7c for details.)

e. **Definition and application of a Focused Learning Plan**: Borderline performance on an assessment or in a course may lead to the assignment of a Focused Learning Plan, which is a short program of additional study, assignments, and/or clinical experience to ensure that the student has met the standards of the course. Course committees are responsible for establishing standards of Focused Learning Plans. A Focused Learning Plan is assigned to a student at the discretion of the course director, in consultation with the Clerkship Director. If the student’s deficit is significant, a further assessment (e.g. a repeat examination) may be required by the course director and Clerkship Director as part of the Focused Learning Plan to confirm the student’s improvement. If the Focused Learning Plan is successfully completed, the original mark achieved on the assessment/in the course will be allowed to stand. In the event that the Focused Learning Plan is not successfully completed, see Section 8b below.
5. **Professionalism**: Satisfactory professionalism competency is a requirement to achieve credit in every course, and assessment of professionalism competency is included in every course. Satisfactory professionalism competency is required to graduate from the program. Assessment of professionalism takes place through competency-based professionalism assessments. Professionalism incidents that require immediate action are addressed through critical incident reports. The MD Program’s professionalism standards of achievement and procedures to address unsatisfactory progress with respect to professionalism are described in the *Guidelines for assessment of student professionalism*.

6. **Standards of achievement in a course as a whole**:  
   a. **Determination of achievement**: It is the responsibility of each course committee to define satisfactory completion of their course as a whole. Specifically:  
      i. **Relative weight of assessments**: Course committees are responsible for assigning the relative weight of each numerically-marked assessment that contributes to the calculation of the final course grade. In accordance with the *University Assessment and Grading Practices Policy*, no single assessment may be assigned a weight of more than 80% of the overall course grade.  
      ii. **Additional expectations for marked assessments**: An assessment’s weight notwithstanding, course committees may establish additional expectations for marked assessments. For example, in a given course, there may be a requirement to achieve 60% on each written exam, in addition to an average overall grade of 60% in the course.  
      iii. **Mandatory non-marked learning activities**: By their nature, mandatory non-marked learning activities are required in order to complete the course.  
   
   iv. **Professionalism**: See Section 5 above.

7. **Definition of provisional course grades in MedSIS**: Provisional course grades differ in some respects from the final grades awarded by the Board of Examiners. Specifically:  
   a. **CR (Credit)** is used to denote that all requirements in the course have been met. This is the grade that will be recommended to the Board of Examiners, barring the availability of new information that calls into question the student’s successful performance in the course, as described in Section 8.  
   b. **NC (No Credit)** is used to denote that a student has not been successful in completing the course due to any of the reasons in Section 6a. The recommendation to the Board of Examiners will depend on the student’s history of academic difficulty, as described in Section 8. If formal remediation is assigned by the Board of Examiners, an interim notation of CON will then replace NC (see below).  
   c. **CON (Conditioned)** is used to denote that a student has been assigned a Focused Learning Plan or formal remediation that is pending completion. CON is an interim, internal notation that does not appear on official documentation. The recommendation to the Board of Examiners will depend on the successful completion of the Focused Learning Plan or formal remediation, and on the student’s history of academic difficulty, as described in Section 8.  
   d. **INC (Incomplete)** is used to denote that a student has not completed/submitted certain requirements.
of the course (marked or non-marked) without making arrangements with the course director. INC is primarily an interim, internal notation that does not typically appear on official documentation. The recommendation to the Board of Examiners will depend on the student’s history of academic difficulty, as described in Section 8.

e. IPR (In Progress) is used to denote that a student has not completed/submitted certain requirements in the course, as arranged with the course director. As an example, this may include a deferred examination or assignment due to illness. Upon completion of the requirements, the assessment mark(s) will be recorded in MedSIS and the (unofficial) course grade will be calculated and recorded, subject to approval by the Board of Examiners. IPR is primarily an interim, internal notation that does not typically appear on official documentation, as deferred assessments must generally be completed before the start of the next academic year.

f. NGA (No Grade Available) is used to denote that a mark or assessment has not been received for a student for reasons unrelated to the student himself/herself. As an example, this may include delayed submission of an evaluation form by the student’s supervisor. The MD Program takes such situations very seriously, and the course director is responsible for remedying the matter as quickly as possible. Upon receipt of the missing mark or assessment, the assessment mark will be recorded and the (unofficial) course grade will be calculated and recorded, subject to approval of the Board of Examiners. A student will never be penalized for incomplete course results due to factors outside their control.

8. Principles governing recommendations to the Board of Examiners: The Clerkship Director (or designate) and Faculty Lead, Ethics & Professionalism will be guided by the following principles in making their recommendations to the Board of Examiners:

a. Successful completion of a course: A grade of “Credit (CR)” in a course will be recommended to the Board of Examiners if a student:

i. has achieved an overall numerical grade of 70% or higher in the course, AND

ii. has performed satisfactorily on any non-marked learning activities in that course, including but not limited to professionalism and logging of clinical experiences in courses where this is relevant, AND

iii. has met all additional expectations for marked assessments that are established by the course, as described in Section 6.a.ii.

b. Remediation: A program of formal remediation will normally be recommended to the Board of Examiners if a student:

i. has not achieved a numerical grade of 60% in a course, OR

ii. has not performed satisfactorily on any non-marked learning activities of the course, including but not limited to professionalism and logging of clinical experiences in courses where this is relevant, by the time of the Board’s meeting, OR

iii. has not achieved a satisfactory score, as established in advance, on the Focused Learning Plan assigned at the discretion of the course director in response to borderline performance, as described in Section 4.
A program of formal remediation may include the repetition of one or more courses when they are next offered the following year, which may require a delay in promotion to the next year or level of medical training. For further details regarding remediation procedures, please see the MD Program’s Guidelines for the assessment of students in academic difficulty and Guidelines for the assessment of student professionalism.

If remediation is approved by the Board of Examiners, credit for the course will not be assigned unless and until the remedial program is successfully completed. If the remedial program is successfully completed, the student will be assigned credit for the course, subject to the approval of the Board.

c. **Borderline performance in a course:** Either a grade of “Credit (CR)” in a course or a program of formal remediation may be recommended to the Board of Examiners, at the discretion and in the best judgement of the Clerkship Director or course director, if a student:

i. has achieved an overall numerical grade in the course that is greater than or equal to 60% but less than 70%, OR

ii. has achieved an overall numerical grade of 70% or higher BUT has not met all additional expectations for marked assessments established by the course as described in Section 6.a.ii, by the time of the Board’s meeting.

The Clerkship Director or course director should be guided in their recommendation by a consideration of all assessments of the student’s performance in the course (including any trend over time), the student’s performance on any assigned Focused Learning Plans, any available evidence of specific areas of weakness in skills or knowledge, and their experience regarding the relative importance of various aspects of the course.

d. **Failure of a year and repetition of one or more courses:** Re-registration in the same level of the program and repetition of one or more courses in that level will normally be recommended to the Board of Examiners if a student has “failed the year,” meaning that he/she:

i. has not achieved a satisfactory score, as established in advance, on a shorter program of formal remediation previously imposed by the Board of Examiners, OR

ii. has not achieved credit on the first attempt in two or more courses in the same level of the program, as confirmed by the Board of Examiners.

At the discretion of the Clerkship Director and/or course director(s), a recommendation may be made for a student to repeat all of the courses in the academic year in question or only the course(s) in which he/she experienced academic difficulty.

e. **Dismissal:** Dismissal from the program will normally be recommended to the Board of Examiners if a student:

i. has not achieved credit in one or more courses on his/her second attempt (“failed repetition”), as confirmed by the Board of Examiners, OR

ii. has failed a year (as defined above) on two separate occasions over the course of the program, as
confirmed by the Board of Examiners.

f. **Promotion**: Recommendations regarding promotion to the next stage of training will be made at the end of each academic year. Promotion from one year to the next will be recommended to the Board of Examiners if a student has achieved “Credit” in all courses by the end of the academic year.

g. **Graduation**: Graduation at the next Convocation of the MD program will be recommended to the Board of Examiners if a student has been deemed to have successfully achieved credit for every program course and requirement, including the specified amount of approved and assessed elective time.

9. **Deviations from normal practice**: Where the word “normally” is used in relation to recommendations to the Board of Examiners, the Clerkship Director, individual course directors, and Faculty Lead, Ethics & Professionalism may choose to deviate from the recommendation that is indicated in these Standards. In such cases, a rationale must be provided to the Board of Examiners for the deviation, and the Board of Examiners will take both the recommendation and the rationale under consideration.

10. **Appeals**: Students may appeal to the Appeals Committee, a standing committee of the Council of the Faculty of Medicine, decisions made by the Board of Examiners.
